

Today you got an email from your Troop Leader, and it said:

Hey, hey Girl Scout!

We are going to go to Cherokee Park tomorrow at 3pm to work on our Eco badge! We will be taking a hike through the trails and picking up any litter we see. Make sure to bring a backpack, water, and a trash bag. I will give out gloves and hand sanitizer. See you there!

Miss Karen

While hiking you find the following items. Take a guess at how long they would have stayed on the trail before they decomposed if you hadn't picked them up.

Aluminum Can

Chip Bag

Paper Napkin

Dog Poo Bag

Banana Peel

Pillow

Glass Bottle

Disinfectant Cloth

Is there anything that you can't believe took so long to biodegrade?

At this point in the video we begin discussing sensitive bathroom matters in the backcountry. If you feel that is not appropriate for younger learners, please feel free to end the video.
